

ISROI-Meeting 2024 – 24 and 25 May 2024 in Freiburg i.Br. Germany

We are pleased to announce the **ISROI Meeting 2024** in close cooperation with DEGRO (AG Digitalisation) and DGMP! In 2018, the 7th edition of the KAI workshop (Clinical and Administrative Informatics in Radiation Oncology) was held for the last time in Freiburg under the chairmanship of PD Dr Felix Heinemann. These KAI workshops and the parallel radiation oncology IT meetings in St.Gallen led to the founding of the International Society for Radiation Oncology Informatics (ISROI) in 2020. In spring 2022, a meeting was officially held for the first time under the auspices of ISROI in St.Gallen. Now, after 6 years, the event is returning to Fribourg - under the name ISROI 2024!

The event is recognised by the German Society for Medical Physics (DGMP), the Swiss Society for Radiobiology and Medical Physics (SSRMP) and the German Society for Radiation Oncology (DEGRO). It is also recognised by the Baden-Württemberg Medical Association (LAEKBW) and is awarded 11 continuing medical education points (CME).

We cordially invite you to come to Freiburg again after 6 years and look forward to your participation!
